

3.1 Introduction to AI and Generative AI

Have you heard about Generative AI? It's the latest buzz in the world of technology, and it's all about using artificial intelligence to create new and unique content. From artwork to music to writing, Generative AI is revolutionizing the way we think about creativity.

Learning Outcomes:

In this section, you will:

- Get introduced to the 'Generative AI' technology.
- Understand the buzz around 'Generative AI'.
- Know about various Generative AI tools.

Imagine a super-smart computer that can help you create anything you dream of — like a friendly robot who paints, writes stories, or even invents new music! This exciting technology is called Generative AI. Generative AI is a type of computer tool that can generate, or make, brand new things based on what it's learned from examples. Let's dive in to see what makes this tool so special and why people are excited about it.

Generative AI is like a magical creative partner. It can grasp a few words as per the instructions you give it and turn them into something amazing! For example, if you ask it to make "a picture of a cat riding a skateboard in space," Generative AI can draw that for you! This is possible because it has learned from millions of other pictures and words to understand what a "cat," "skateboard," and "space" look like.

Why Is Everyone Talking About Generative AI?

Generative AI is helping people create cool things more quickly than ever before. Artists, teachers, musicians, and kids like you are using Generative AI to bring their ideas to life. Imagine making a comic book, designing a new game character, or creating a birthday card — all with the help of AI! This technology has become popular because it makes creating things easier and faster. It's like having an "art assistant" or "story helper" whenever you need it.

Meet Some Fun Generative AI Tools

Now that you know a bit about Generative AI is, let's get familiar with some tools that use it!

1. **Adobe Firefly in Adobe Express:** Firefly can turn your ideas into art. Just provide a description, like "a purple dragon with wings made of stars," and Firefly creates the picture for you! You can even add cool effects to words, like making text look like glitter or slime.
2. **ChatGPT:** This AI tool can help you write stories, answer questions, or come up with creative ideas. Say you need a story about a superhero dog who loves pizza. ChatGPT can help you write it, even giving your character a name and fun details.

Tip for the Teachers:

This section consists of four components. The teachers are requested to direct the students towards the online course on 'Digital Creativity and AI Skills (Level-1)' to complete the various components of this skill subject.

1. **Ignite:** The students are required to login into the online 'Digital Creativity and AI Skills (Level-1)' course and click on section 3.1 to watch the video.
2. **Skill Check-up:** The students are requested to finish the knowledge check-up in the online course
3. **Synergize:** A collaborative activity to have fun whilst creating and learning. Divide the students in groups and collaborate through Adobe Express school accounts provided. .
4. **Explore:** To learn more about Generative AI by accessing the resources.

Tip for the Students:

Below is the exercise provided for your classroom, you are requested to complete this exercise online as guided by your teacher. Scan the QR code for Skill-check up.

Select the right option out of those given below:

1. What is Generative AI technology?
 - a) An advanced gaming console
 - b) A computer program that generates new and original content using artificial intelligence
 - c) A virtual reality headset
 - d) A social media platform for sharing creative projects
2. What are some examples of content created using Generative AI?
 - a) Only artwork
 - b) Only music
 - c) Artwork, music, and stories
 - d) Only video games
3. Why is there buzz around Generative AI?
 - a) Because it's a new type of social media platform
 - b) Because it's revolutionizing industries like music, gaming, and design
 - c) Because it's a tool for organizing virtual events
 - d) Because it's only available to professional artists
4. What is Adobe Firefly?
 - a) A tool for creating digital animations
 - b) A Generative AI image editing tool
 - c) A social media platform for sharing artwork
 - d) A video game developed by Adobe

Synergize
Collaborate and create

Tip for the Teachers:

This group activity will be performed on Adobe Express Students' School Account. Upon completing the activity, the students will be required to copy the URL and paste it at the provided location under the online course and submit it. You are requested to divide the students into groups of 3.

Activity 3.1.1 : Reflect on the buzz surrounding Generative AI technology.

Objective: To understand the use of Generative AI in the classroom.

Instructions:

- This group of activity will be performed on Adobe Express Students' School Account.
- Create a simple two-slide presentation on the usage of Generative AI in schools and how it helps enhance learning outcomes.
- In the presentation, also include an artwork that is generated using the Generative AI tool of Adobe Express using your educational account.
- Reflect on your creative process and the experience of using Generative AI-inspired techniques in Adobe Express. Consider how this technology influenced your artistic expression and creativity.
- Upload the assignment on the link provided here.
