

3.3 Writing Generative AI Prompts

All of us are creative and we all have the ability to imagine endless and interesting ideas. Adobe's Generative AI removes the barriers between your imagination and the blank page.

With Adobe Firefly embedded within Adobe Express, we learnt in the previous section how easy it is to generate beautiful images or add text effects. It is all done by using simple words to describe what you want to create.

In this digital age, AI isn't just about performing tasks – it's about inspiring ideas and igniting your imagination.

Learning Outcomes:

In this section, you will:

- Understand what are Generative AI Prompts.
- Learn writing the prompts to generate the desired image or text effects.

Creating Images Using Text Prompts

A **prompt** is a message or question we give to a computer program, like a Generative AI, to explain what we want to create. For example, if you say, "Draw a cat with wings," that's a prompt that guides the AI to make a picture of a cat with wings!

How Does It Help in Creating Images?

When we give a prompt to a Generative AI, it uses what it has learned to create an image based on our description. If we say, "Show me a purple cat with wings," the AI will think of all the purple cats and wings it knows and combine them to make a brand-new picture!

Using Generative AI Prompts to Explore Science, History and Other Subjects

Generative AI image prompts are an exciting way for students to visually explore the Harappan Civilization and understand its remarkable achievements. By giving specific prompts to the AI, students can generate images that represent key aspects of this ancient culture.

For example, a prompt like, "Create an image of the city layout of Mohenjo-Daro, showing its advanced drainage system and multi-storied houses," can help students visualize how this city was planned and built. These images can enhance their understanding of urban design and the sophistication of Harappan architecture.

Additionally, students can use prompts to generate images of artifacts, such as pottery, seals, and tools that were commonly used during the Harappan period. A prompt like, "Show me examples of Harappan pottery and seals," can produce images that illustrate the artistic styles and craftsmanship of the time. These visuals not only make learning more engaging but also help students connect with the history of the Harappan Civilization on a deeper level. By incorporating Generative AI image prompts into their projects, students can create compelling presentations and reports that highlight the cultural richness and innovations of one of India's earliest urban civilizations.

Tip for the Teachers:

This section consists of four components. The teachers are requested to direct the students towards the online course on 'Digital Creativity and AI Skills (Level-1)' to complete the various components of this skill subject.

1. **Ignite:** The students are required to login into the online 'Digital Creativity and AI Skills (Level-1)' course and click on Section 3.3 to watch the video.
2. **Skill Check-up:** The students are requested to finish the knowledge check-up in the online course.
3. **Creativity Showcase:** For this section, the teachers are requested to assist the students to login into their Adobe Express school accounts and guide them with the steps of the activity.
4. **Explore:** To learn more about Generative AI by accessing the resources provided.

Tip for the Students:

Below is the exercise provided for your classroom, you are requested to complete this exercise online as guided by your teacher.

Select the right option out of those given below:

1. **What is a prompt in the context of Generative AI?**
 - a) A tool for generating creative ideas
 - b) A set of cues and instructions to generate creative output
 - c) A creative spark that inspires ideas
 - d) A constraint for limiting creativity
2. **Why is it important to write precise prompts for Generative AI?**
 - a) To confuse the AI algorithms
 - b) To encourage broad exploration of ideas
 - c) To clearly communicate desired outcomes
 - d) To limit creative possibilities
3. **Which of the following is a tip for writing precise prompts using Generative AI in Adobe Express?**
 - a) Including vague descriptions to allow for more creative freedom
 - b) Using adjectives sparingly to avoid overwhelming the AI
 - c) Being specific with details such as colors, objects, emotions, or settings
 - d) Avoiding iteration and refinement to maintain consistency
4. **Miraya wants to generate a beautiful sunset-time scenery of Tulip fields in Amsterdam with a wind mill. Which one of the prompts you think will generate the desired image?**
 - a) Windmill with tulip fields during a sunset
 - b) Huge field of pastel tulips, an old-fashioned windmill, rolling hills, on a dark stormy day, orange and purple sky with rain and lightning, dark, mysterious
 - c) Vibrant fields with a Dutch windmill at sunset, bathed in warm golden light
 - d) Golden sun over tulip fields in Amsterdam with a traditional windmill in the evening breeze
5. **Ishvin is looking to craft a Sponge Bob-themed portrait for his 4-year-old brother's birthday card. What instructions should he provide to generate an accurate image of Sponge Bob SquarePants?**
 - a) A laughing cheese runs through the city; cartoon character, square shaped body , square pants
 - b) A spongebob with square pants
 - c) A yellow character with square body and pants, big eyes, and a wide smile
 - d) A cartoon sponge with square pants, standing on a beach with a big grin

Creativity Showcase

Hone your creative skills

Tip for the Teachers:

This activity will be performed on Adobe Express Students' School Account. Upon completing the activity, the students will be required to copy the URL and paste it at the provided location under the online course and submit it.

Tip for the Students:

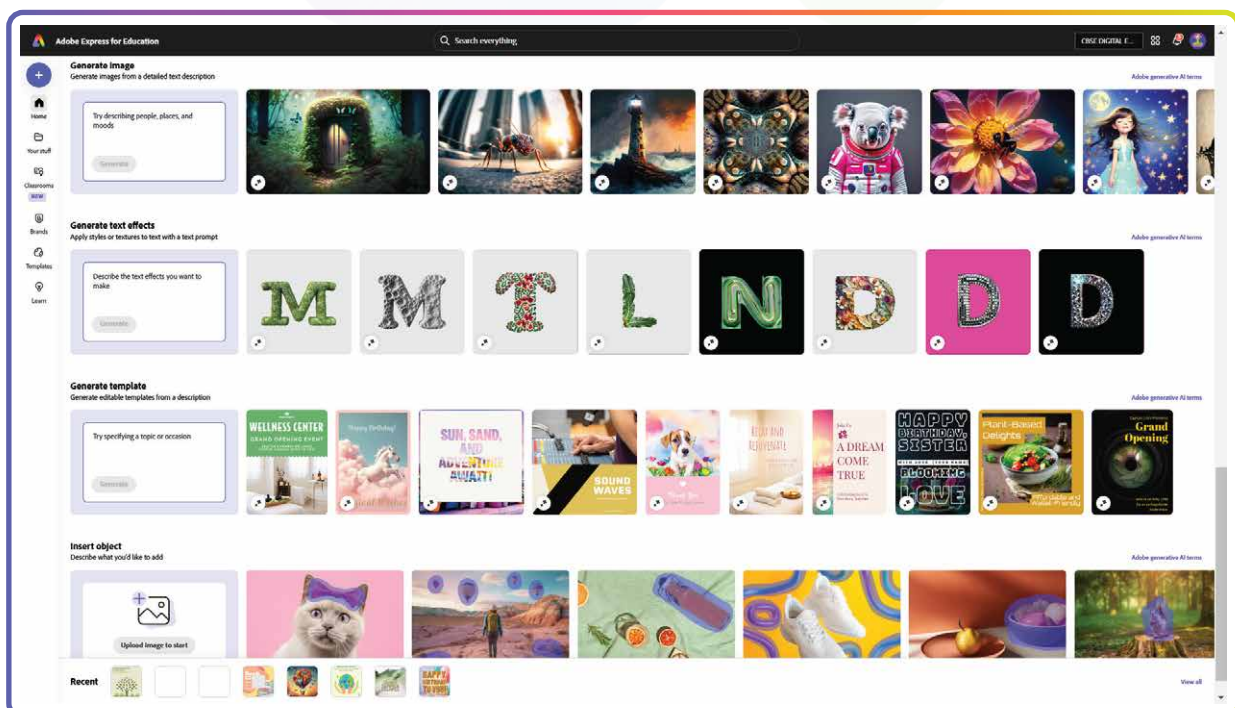

This is an individual activity. Each student will have to login into their Adobe Express school account. Do not forget to submit the assignment to complete the course.

Activity 3.3.1 : Art of prompt texting

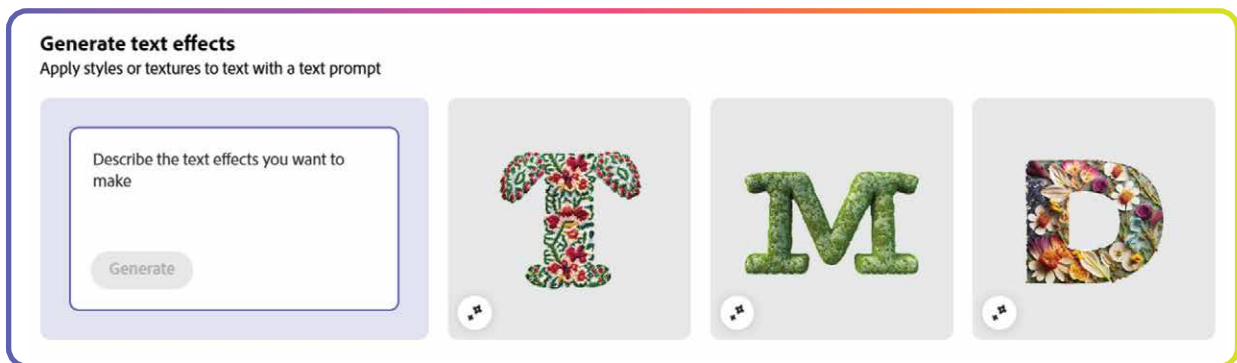

Objective: To understand the power-play of words to add text effects using Generative AI.

Instructions:

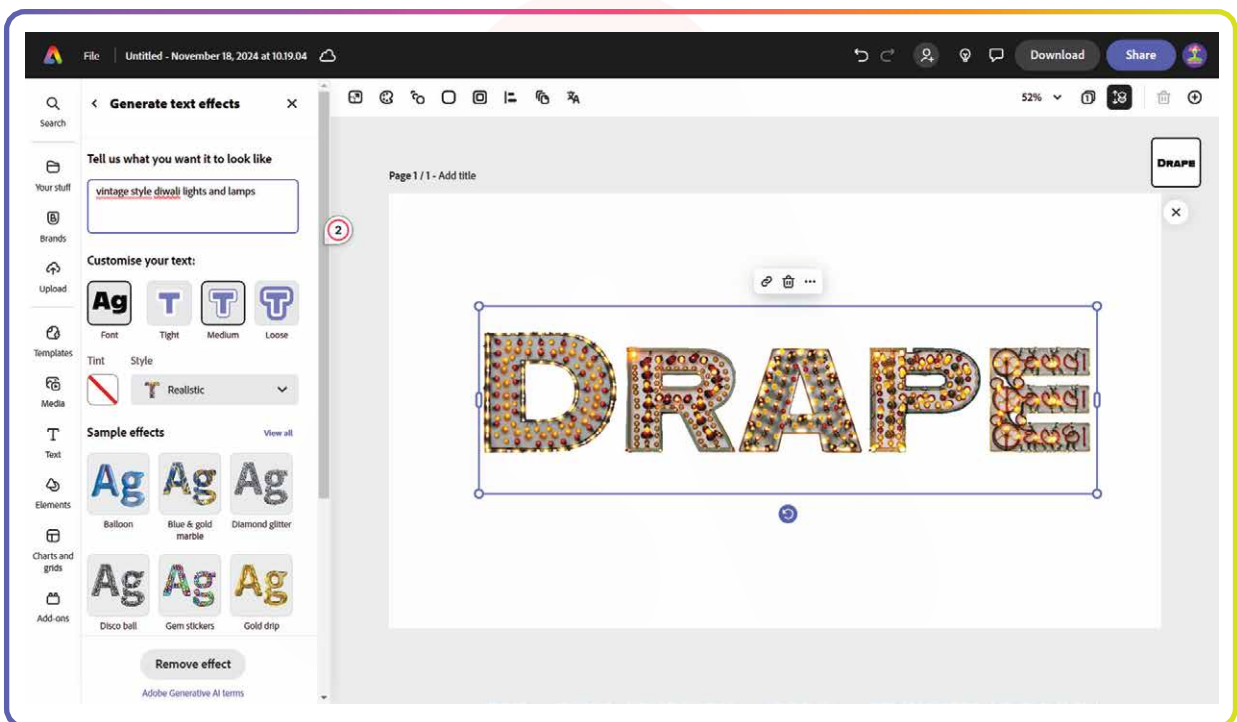

- Login into your Adobe Express School account. Scroll down the dashboard to find various features of Generative AI.

- Go to the feature Generate Text Effects of Generative AI.
- Use your imagination to create text effects using text-prompts in the empty space provided.

- Create a text effect for any of the festivals, Diwali, Lohri, Ugadi, Eid, etc.

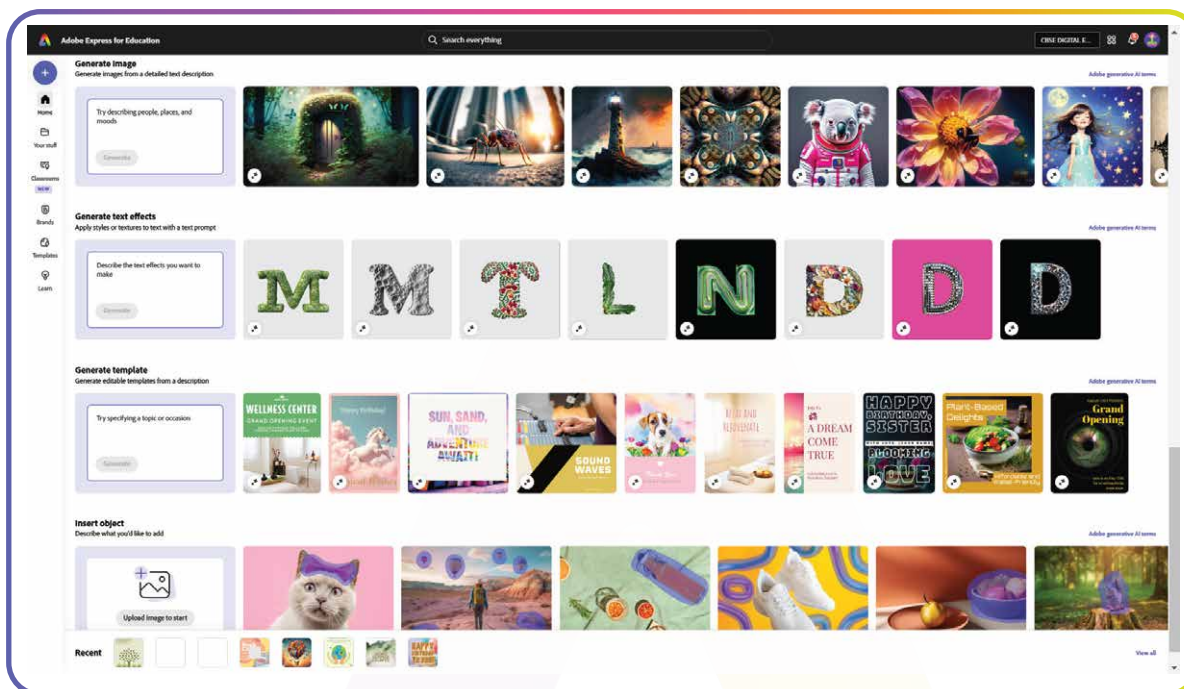

- Add text effects and **download** your creation.
- You can also click on '**Share**', '**View only Link**' and '**Create a Link**' to publish your creation.
- **Copy the URL and paste it** onto the online learning platform and hit submit.

Activity 3.3.2 : Crafting Precise Prompts for Generative AI in Adobe Express

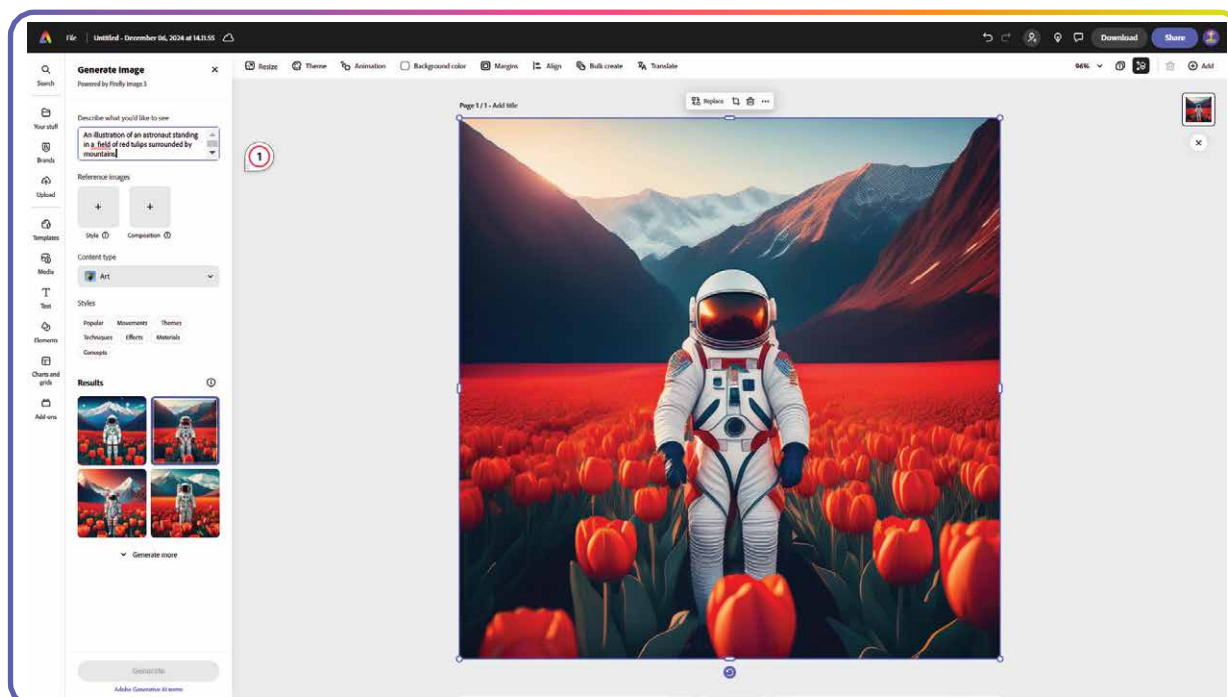

Objective: By the end of this activity, you will be able to write precise prompts to effectively utilise Generative AI in Adobe Express.

Instructions:

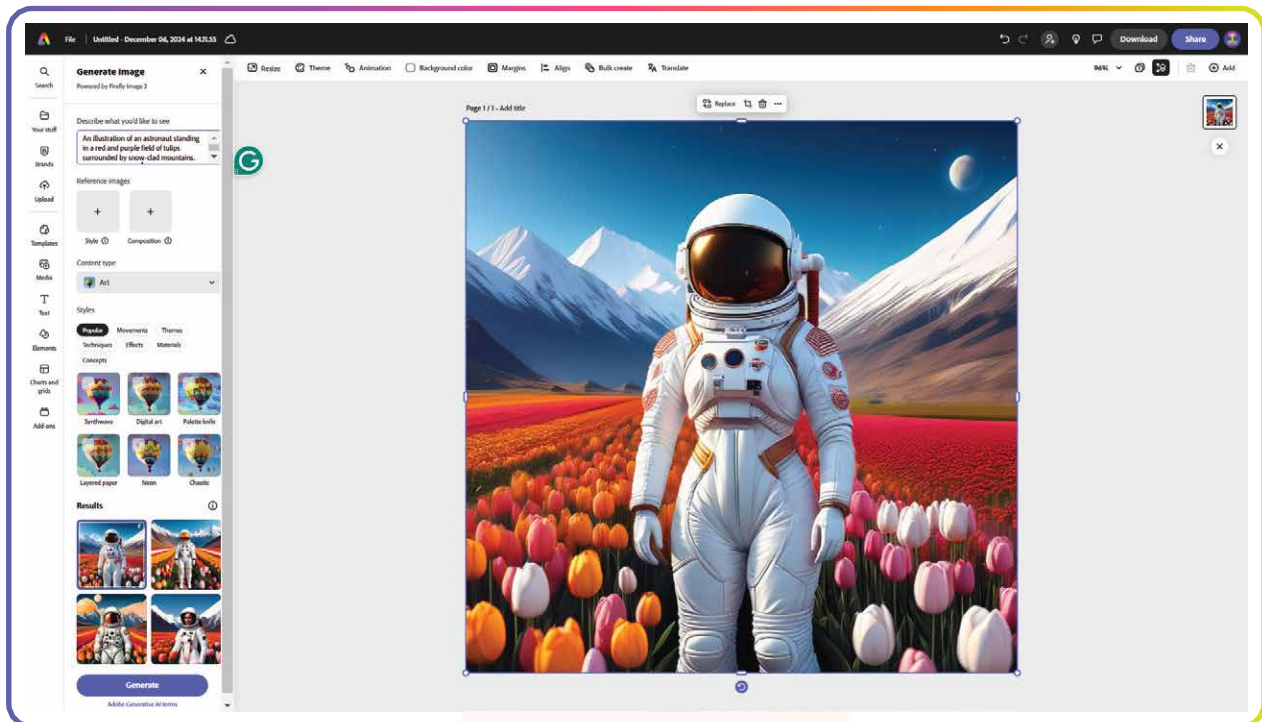

- Think of at least two scenarios for which you want to create visuals.
- In Adobe express, use the Generate Image feature to write precise prompts for each scenario or image using the techniques demonstrated.

- Consider colours, objects, emotions, settings, descriptive adjectives, and relevant context in your prompts.
Here, the prompt is: An illustration of an astronaut standing in the field of red tulips surrounded by mountains

- Iterate to refine your prompts and achieve the desired outcome.
Here, the prompt is: An illustration of an astronaut standing in a red and purple field tulips surrounded by snow clad mountains, sunny day, clear sky

- **Download** your creation.
- You can also click on '**Share**', '**View only Link**' and '**Create a Link**' to publish your creation.
- **Copy the URL and paste it** onto the online learning platform and hit submit.
